

iPulse AI

OPTIONS ALPHA AGENT

INSPECTABLE • AUTONOMOUS • PAPER TRADING

A trade is not proof of intelligence

BLACK BOX

Signal
Order
Outcome

No visible evidence.
No preserved dissent.
No reason for refusal.

INSPECTABLE AGENT

Evidence
Disagreement
Risk decision
Broker receipt

WAIT and REJECT are evidence, too.

Never let one AI own the conclusion

PROBABILISTIC RESEARCH

01 Technical regime

02 News catalyst

03 Options liquidity

04 Financials auditor

05 Value framework

06 Risk critic

**Consensus
proposes**

**Deterministic
safety
decides**

Every advisor cites evidence, contrary evidence, confidence, and an invalidation condition.

Reasoning may evolve. Capital boundaries stay explicit.

01 Environment

Paper account only · two explicit execution switches

02 Market state

Open session · fresh quote · complete broker state · no duplicate

03 Order and portfolio

One contract · limit only · long premium · max loss \$500 · circuit breakers

A clean account and an honest starting line

Dedicated Alpaca paper account created for the competition. Raw identifiers never enter public artifacts.

\$100K

starting equity

LEVEL 3

options approval

0

initial fills

Connectivity proof: one deliberately non-marketable \$1 equity limit order, canceled without a fill.

The agent passed its refusal test

WAIT

A real retained run reached aligned technical and options views—then stopped.

MARKET CLOSED

Regular US session was not open.

QUOTE STALE

The option quote exceeded the 120-second limit.

No fallback. No forced demo trade.

From evidence to paper P&L, every step stays reviewable

01

Public code

Tests, strategy, MCP adapter, and risk gates

02

Decision dashboard

Advisor dissent, vetoes, orders, and scorecard

03

Competition evidence

Dedicated account baseline and paper performance

AI proposes. Deterministic risk decides. Alpaca executes.
